MAUREL CHAIRINNISWAH YASMINE

Computer Science Student | Aspiring Data Engineer / Data Analyst

Jakarta, Indonesia | +62 898-1185-585 | echamaurel@gmail.com

LinkedIn: Maurel Chairinniswah Yasmine | GitHub: maurel-yasmine | portofolio-maurel.vercel.app

Computer Science student at Bina Nusantara (BINUS) University specializing in Database Technology, with a strong interest in Data Engineering, Data Analytics, and Business Intelligence. Experienced in building ETL pipelines, data warehouses, and BI dashboards using Python, SQL, Pentaho, Power BI, and Tableau. Known for a structured, step-by-step approach to completing tasks and strong team collaboration skills, built through hands-on technical projects and leadership roles in cross-functional organizational teams.

EDUCATION

Bina Nusantara University — B.Sc. Computer Science, Database Technology *2024 – 2028*

GPA: 3.51 / 4.00 (through 4th semester)

Relevant Course: Data Engineering, Big Data Processing, Database Technology, Data Mining, Data Analytics, Data Visualization, Geographical Information System

PROJECTS

Hotel Booking Analytics: ETL & BI System

Data Engineering | End-to-End Data Pipeline

- Developed an ETL pipeline using Pentaho Data Integration to clean and transform 6.51M hotel booking records.
- Designed a MySQL star schema consisting of 1 fact table and 11 dimension tables for analytical reporting.
- Developed interactive Power BI dashboards to analyze revenue and booking cancellation trends.

TechSignal Intelligence: AI-Powered Trend Analytics Platform

Data Engineering | Medallion Architecture Pipeline

- Architected a robust operational database in PostgreSQL and implemented incremental PySpark ETL jobs to process complex JSON arrays and AI-Generated sentiment data.
- Designed and deployed a Medallion Architecture data warehouse (Bronze, Silver, Gold) on Google BigQuery to ensure high data quality, indempotency, and analytical readiness.
- Built interactive Tableu dashboards connected natively to BigQuery Gold tables, revealing actionable insights into emerging tech trends, sentiment distribution, and pipeline health.

Soto Seger Solo Lumintu: POS & BI System

Full Stack & Business Intelligence

- Developed a web-based Point-of-Sale system using Laravel and a normalized MySQL database.
- Built a Pentaho ETL pipeline to transform transactional data into a star schema data warehouse.
- Developed Power BI dashboards to monitor revenue, profit margins, and sales trends.

EuroMart Sales & Profitability Dashboard

Data Visualization & Dashboard Design

- Conducted exploratory data analysis (EDA) in Python on a Kaggle retail dataset to examine sales, profit distribution, and discount impact.
- Applied Pareto analysis to identify that 7 of 17 product sub-categories drove 80% of total sales, guiding inventory and promotion priorities.
- Built an interactive Tableau dashboard with cross-filtering and highlight actions, revealing that discounts above 20% consistently eroded profit.

ORGANIZATIONAL & LEADERSHIP EXPERIENCE

HIMTI BINUS University — General Manager, Public Speaking Team *2026/2027*

- Led a 23-member Public Speaking Team, comprising 17 members and 6 committee members.
- Organized and facilitated a Public Speaking internship program focused on event hosting and MC skills.
- Supported MC selection and guidance for 25+ events, ensuring suitable assignments and event readiness.

First Year Program, BINUS University — Freshmen Leader & Freshmen Partner *2025/2026*

- Freshmen Leader: Guided 40+ freshmen through the 7-day FYP Program, from opening ceremony to inauguration; the assigned class achieved Top 1 Performance.
- Freshmen Partner: Mentored 6 freshmen for one academic year, providing academic and project guidance, including a Community Service Project planting 100+ sea pines in East Semarang.

Master of Ceremony — Codeavour International, BEEFest BINUS, HIMTI x BCA Webinar *2025/2026*

- Hosted academic, organizational, and professional events, managing event flow and audience communication.

SKILLS

Programming & Libraries: SQL, Python (Pandas, NumPy, Matplotlib, Seaborn), R (learning), RapidMiner (learning)
Databases: MySQL, PostgreSQL (learning), Google BigQuery (learning)
Data Engineering & ETL: Pentaho Data Integration, Data Warehousing, Star Schema Design, Apache Spark (learning)
Data Analytics Tool : RapidMiner
Data Visualization & BI: Power BI, Tableau
Tools: Git/GitHub, Microsoft Workspace, Google Workspace, Canva, Laravel, Figma
Languages: Indonesian — Native | English — C2 (Intermediate)
